HyperionDev Task 54 - Express React App

Due to the size of this build with all of the modules, I thought the easiest way to share for code review is via the github repo I have it in.

I hope this is okay, the task to upload it to heroku is stated as optional and I'm struggling for time at the moment so have opted to not do this for now.

Link to public repo here - https://github.com/whippet-code/Express-React-Build

Many thanks,

Mark I
